- Semi-Automatic feeder MF4
- 50 cost centres with clear-text designation (optional up to 250 cost centres)
- Dimensions (L x W x H) 566 x 217 x 205 mm

Standard features

- ComTouch™ (simple control panel displaying only what you actually need)
- 30 programmable OneTouch functions make franking child's play: all the postal products you need are at your fingertips
- Tariff guide with quick access to other postal products makes fast work of the most complex mailings: only a few keystrokes are required
- HQ 600 dpi print mode (optimal contrast and crisp lettering to make a perfect impression)
- Digital freedom for optimal convenience and ready for market data capture
- 10 mm thickness capacity (enough for nearly all letters)
- Direct franking of supplemental postal services, such as special delivery and registered mail with or without return receipt, by 1-D barcode printing
- 8 different advertising stamps, which can be designed any way you like

Frama Matrix F6

- Speed: 5500 letters per hour
- Automatic feeder AF6 with automatic adjustment for letter thickness (eliminates tiresome manual setting) and optional envelope sealer
- 100 cost centres with clear-text designation (optional up to 250 cost centres)
- Dimensions (L x W x H) 820 x 217 x 205 mm

Standard features

- 3 standard advertising messages saved in the system for general use
- 3 different texts you can programme yourself for printing out with your advertising stamp
- 2 alternative cost-allocation timeframes (e.g. by days and weeks or by weeks and months)
- A variety of reports, Frama Online, settings, counter readings etc.
- Blocking of high franking amounts (for additional security)
- Automatic date setting
- Incoming mail stamp function with date
- Interface for postage scales
- Built-in modem

Frama

Frama AG, founded in 1970, has always been characterised by progressive evolution towards greater convenience, enhanced intelligence and constant improvement.

Up until the end of the eighties, we manufactured mechanical masterpieces – robust franking machines that provided trouble-free service for decades.

Since then we have incrementally and systematically replaced mechanical components with electronics for simpler and more cost-effective operation.

At the same time we have developed comprehensive modular solutions with great development potential; they grow along with the tasks they are given, offering you ideal investment protection.

Added value

Whether in intelligent, networked franking systems or fully automated integral system solutions, Frama creates added value by uncompromisingly focusing on your needs.

System competence

By concentrating our talent in a single location, we systematically preserve and develop strategic know-how inhouse at our Swiss headquarters.

Quality

All our products and systems are manufactured in Switzerland – according to state-of-the-art technology and unsurpassed quality standards, by highly qualified employees who receive first class training.

Competitive edge

Our unique technological competence gives us the independence, flexibility and speed of response required for a continuous market inflow of benchmarking innovations.

Solutions

Our wide offering of franking and weighing systems is optimally rounded off with supplementary products such as letter openers and folding machines, as well as comprehensive support services.

Reliable performance and convenience: the Frama Matrix F4 and F6 franking systems

Medium to large organisations today have completely new demands on their franking systems. The Frama Matrix F4 and F6 franking systems meet these demands ideally, with outstanding user-friendliness, unequalled print quality and customised services.

Frama Matrix F4

The Frama Matrix F4 and F6 franking systems come fully configured ready for use. Commissioning, changing, and setting inkjet cassettes are child's play with this plug & play system.

By adding a Frama scale to the Matrix F4 and F6, you can optimise your post handling even further.

The Business Mail / PPI printing feature opens up new horizons for you. By direct franking of bulk postal services, such as Business Mail and PPI all you have to do is simply ask the post office to collect your bulk mailing.

You have 30 programmable OneTouch keys at your fingertips to select the most frequently used mail classes and tariffs for your regular mailings. Bar charts show you at all times how much postage credit and franking ink you have left.

The HQ print mode gives the finishing touch to your correspondence. At 600 dpi it applies your company logo or other advertising messages in impressive contrast and crisp lettering on a wide variety of envelope stock. Switchable to 300 dpi.

With the Matrix F4 and F6 you also benefit from FeedControl. How? Your envelopes are always correctly printed in exactly the right place! That gives you added security, makes a high-class impression – and saves you money as well.

With the automatic built-in label dispenser, franking envelopes more than 10 mm thick and packets becomes child's play.

The AF6 automatic feeder immediately upgrades your Frama Matrix F4 into a Matrix F6. This extremely user-friendly feed system automatically adjusts for thickness, and any paper blockages are easily released. You can also add an optional envelope sealer.

Forget about postage tables and user instructions.

Do you send quite a lot of post? Do you send out mailings from time to time? You certainly want to make a good impression! Do various employees deal with your daily post? If so, Frama Matrix F4 and F6 franking systems will meet your needs perfectly.

The Frama Matrix F4 is a semi-automatic feed franking system with label dispenser. The F6 model has automatic feed and can also be fitted with an optional envelope sealer.

Our unique ComTouch™ operating concept (patented) with OneTouch technology makes skilled labour unnecessary for handling your post.

Intuitively and in dialogue, it guides you through the franking process and quickly computes the correct tariff – no need for postage tables or user instructions!

OneTouch is a sophisticated self-explanatory operating concept. At the touch of a key you can select up to 30 freely programmable mail class combinations, from standard letter to complicated overseas mailing.
